

# Current Treatment For Bipolar Disorder

If you have been newly diagnosed with bipolar disorder, your doctor will recommend medications that can help control your moods and prevent bipolar episodes.

To help determine if STAVZOR could be treatment option for you, fill out this sheet and take it with you to your doctor:

Date: \_\_\_\_\_

I'm currently being treated with medications for bipolar disorder.    Y    N

I'm thinking of stopping or have stopped taking my current medication.    Y    N

My reasons why:

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_

I would like my doctor to answer these questions about changing my medication for bipolar manic episodes:

1. Is it difficult to change medications?
2. Did you know there's a smaller, easy-to-swallow pill available to treat my manic episodes called STAVZOR?
3. Could STAVZOR work for me?

Your doctor's responses:
